

Storm Water

AWARENESS

Week

★ SEPTEMBER 26-30, 2016 ★

SWAW 2016 Announcement:

Condor Earth is participating in the Fifth Annual Storm Water Awareness Week (SWAW) which is scheduled for September 26 through 30, 2016. SWAW consists of free storm water educational opportunities held throughout California that cover industrial, construction, and municipal storm water issues. These workshops are open to the public; attendees have included industrial, construction, municipal permittees, and regulatory staff (City/County staff and State/Regional Water Board representatives). Workshops are provided by storm water consultants, service providers, vendors, regulatory agencies, municipalities, non-profit organizations, and others.

Condor Earth will present the workshop topics listed below, all designed to enhance your storm water program. In addition, Condor Earth is pleased to partner with Torrent Resources, StormTrap/FreshCreek, and Filtrexx International to educate attendees about options for groundwater recharge, trash capture Best Management Practices (BMPs), and passive treatment of storm water industrial pollutants, respectively.

- *Drought-Tolerant Storm Sampling by Jordan Johnson (Condor Earth)*
- *Storm Water Inspections Demystified by Karen Jackson/David Belt (Condor Earth)*
- *End an ERA: A Discussion on Level 1 Exceedance Response Actions (ERAs) by Micheline Doyle Kipf (Condor Earth)*
- *Full Capture Trash System – An Option for Track 1/Track 2 Compliance by Ed Cristobal (StormTrap/FreshCreek)*
- *Discharge to Recharge: Use of Drywells in Storm Water Management by Karen Jackson/David Belt (Condor Earth) and Travis Pacheco (Torrent Resources)*
- *“Show Me... Don’t Tell Me”; New Innovations in the Passive Treatment of Storm Water Industrial Pollutants by Bryan Hoffman/David Franklin (Filtrexx International)*
